

# C2400

## C2400 SQUEEZE BOSS

For 16" to 24" PE Pipe

### MODEL FEATURES

- Engineered for heavy-wall, large-diameter HDPE pipe
- Unmatched strength, delivering 791 tons of squeeze force
- Built for tough field conditions with heavy-duty engineering
- Detachable control handles for secure handling straps
- Enhanced swing-out bottom bar design

# C2400

The C2400 Squeeze Boss is the strongest squeeze tool on the globe, delivering an unrivaled force and durability for large-diameter HDPE squeeze-off applications.

The C2400 Squeeze Boss is designed for 16" to 24" HDPE pipe (SDRs from 7 to 21). Built on our large-diameter squeeze-off platform, it is engineered to endure the most demanding field conditions, ensuring superior performance in HDPE pipeline operations.

Engineered for superior handling, the C2400 incorporates precision-machined aircraft-grade aluminum, chrome-plated steel side shafts. The innovative and enhanced lock-in/swing-out bottom bar design allows for easy and effective installation, while the lock-down bolts ensure squeeze integrity after hydraulic disconnection.

| SIZE (DIAMETER)     |                  | SDR                    |       |
|---------------------|------------------|------------------------|-------|
| 16"                 |                  | 7, 9, 11, 13.5         |       |
| 18"                 |                  | 7, 9, 11, 13.5, 17     |       |
| 20"                 |                  | 7, 9, 11, 13.5, 17, 21 |       |
| 24"                 |                  | 7, 9, 11, 13.5, 17, 21 |       |
| WEIGHT              | SQUEEZE CAPACITY | HEIGHT (closed/open)   | WIDTH |
| 5700 lbs (2585 kgs) | 16" to 24"       | 82.6" / 108"           | 72"   |
